## Electronic Mailscanner

Westminster's Electronic Mailscanner provides reassurance for mailroom staff. It is extremely easy to use and will alert staff automatically upon encountering a suspect package.

It can detect common mail bomb components regardless of the type of explosive used, plastic or otherwise.

Mail room staff can quickly screen handfuls of mail or small packages, and it has the ability to bypass ordinary metallic stationery items such as paperclips and staples; which means there is no disruption or delay in daily mail room procedures.

### Features

- ▶ **Fast and reliable:** can quickly screen bundles of mail and parcels up to 2.5" (6cm) thick;
- ▶ **Automatic Verification:** alerts instantly upon encountering potentially harmful items of mail, e.g., mail bombs and their components (batteries, detonators), razor blades, weapons. Provides both audible and visual alarms;
- ▶ **Discrimination:** ignores completely harmless stationery items such as paperclips and staples to avoid disruption to normal business and mail handling procedures;
- ▶ **Safe and easy to use,** ready to operate straight away. Requires no calibration, set-up or operator training. Emits **no radiation** and will not damage camera film, magnetic tape or computer discs. Incorporates extra back-up circuitry;
- ▶ **Portable:** weighs just 9 kgs. It can be moved to reception areas for spot checks on hand-delivered items and courier deliveries. Integral battery can be used when mains power is not available.

Quickly scan handfuls of mail or small packages.

Mail bomb components are automatically detected.

Contaminated razor blade letters are automatically detected...

...but ordinary paperclips and staples are allowed through to avoid disruptions to normal business correspondence.

# Electronic Mailscanner

## Specifications

- ▶ Power supply: Switchable 110/220V, 50/60 Hz;
- ▶ Integral Battery: 12V nominal DC, Internally fused at 4.0A;
- ▶ Back-Up Operation: Integral battery with automatic recharge supplies approximately 3 hours operating power if mains power is unavailable;
- ▶ Incorporates Back-up Circuitry which can be switched on in the unlikely event of unit malfunction;
- ▶ All circuitry is modular to facilitate service and module exchange;
- ▶ Dimensions: Unpacked: 40cm x 45cm x 22cm;
- ▶ Weight Unpacked: 9kgs;
- ▶ Packed: 55cm x 51cm x 32cm;
- ▶ Weight 14 kg.
